

THE "V" IS FOR VERSATILITY.

Each horizontally reinforced, steel backed poly section, comes with a double-acting 1 1/2" x 9" ram. The Arctic HDVTE-P full-grip joystick puts unprecedented control in the palm of your hand. Winter can visit, but it does so on your terms. Built for full-size vehicles and larger.

4 LASER-CUT, STEEL VERTICAL RIBS, AND 3 HORIZONTAL SUPPORTS

on each wing, back our frictionless poly moldboards with the strength of steel

HOT-DIPPED GALVANIZED STEEL FRAME

provides added resistance to abrasion, water and rust, making our plows virtually maintenance free

DOUBLE LIFT CHAINS

for extra lift strength and safety

3/8" POLYETHYLENE MOLDBOARD

throws snow further and faster resulting in less resistance and vehicle wear, and improved fuel economy

A 1 3/16" X 23 1/2" GREASEABLE KINGPIN

with a reinforced pin housing comprised of seven 2 1/2" x 5/8" wall bushings, provides tremendous strength

6" DEFLECTOR

keeps snow down on the blade and away from the driver's windshield

9" STROKE, DOUBLE-ACTING CYLINDERS

enable a full blade angle of 30 degrees in "V" and scoop position

LASER-CUT HOLES

for optional bolt on wing kits

1/2" X 6" HARDENED, HIGH CARBON STEEL CUTTING EDGE with top hole bolt pattern

OPTIONAL WING EXTENSIONS

WHY CHOOSE POLY?

Arctic's high density polyethylene moldboards combine the durable, slick characteristics of poly with advanced blade design mechanics to throw more of even the stickiest, wettest snow further and faster. This not only results in more snow being moved more quickly, it also minimizes forward resistance – meaning decreased wear on power trains and increased fuel economy. **Contact your Arctic Dealer to learn more about the high-tech, low-maintenance benefits of poly.**

M3500V SERIES HYDRAULIC POWER UNIT
The M3500V power unit has been designed around the proven M3593. The valve block has been changed to a 7 valve configuration to drive the double acting wing rams. This unit offers one of the highest power outputs in the industry, which means faster operation and less wear on the battery. Standard operating pressure is 2200 psi. Four crossover relief valves are set at 3000 psi.

QUIK*LINK® II AND III MOUNTING SYSTEMS
Featuring an adjustable jack stand, our mounting systems allow you to remove the entire plow assembly as a single unit with the lift frame intact. QUIK*LINK® II uses mounting pins on either side of the system to easily attach and detach the plow from your vehicle. Arctic's QUIK*LINK® III system makes the already-simple mounting system even easier to use by replacing the two mounting pins with a simple single locking bar.

ARCTIC HDVTE-P SPECIFICATIONS

Plow Name	HDVTE96-P	HDVTE108-P
Length	96"	108"
Moldboard Height	29"	29"
Material	3/8" Poly	3/8" Poly
Plowing Width (Full Angle)	83"	94"
Complete Weight	*802 lbs	*837 lbs
Mounting Type	Detachable	Detachable
Removable Lights and Power Unit	Yes	Yes

STANDARD CONTROLLER

HAND HELD
This ergonomic controller has 9 rubber-faced buttons, a float light in the middle and a curly cord. An automatic shut-off eliminates accidental use or drained batteries.

OPTIONAL CONTROLLER

JOYSTICK
The joystick is mounted to a window mount bracket, placed in the window opening of the driver's side door. The joystick gives the operator 11 functions of the plow, all from the driver's left hand, without the use of mode switches.

* Weight does not include undercarriage

QUIK*LINK® is a registered trade-mark of Arctic Equipment Manufacturing Corporation.

LEGAL DISCLAIMER: Vehicles intended to be equipped with Arctic equipment must comply with the vehicle manufacturers' specifications for equipment application. Please consult your vehicle dealer before purchase and installation. The purchaser assumes all vehicle risk associated with the attachment and operation of Arctic equipment.
