

HEAVY DUTY WITH EXTRA ARMOR.

Built for full-size heavier vehicles, the **Arctic HDXL-P** offers all the same great features as the Arctic HD-P in a wider, heavier package. In addition to the slick polyethylene skin, open pins, and a hardened, high-carbon cutting edge, the **Arctic HDXL-P** is reinforced with a horizontal steel support. It's the workhorse of our fleet, with extra armor.

7 LASER-CUT, STEEL REINFORCING RIBS

back our frictionless poly moldboard with the strength of steel

HOT-DIPPED GALVANIZED STEEL FRAME

provides added resistance to abrasion, water and rust, making our plows virtually maintenance free

3/8" POLYETHYLENE MOLDBOARD

throws snow further and faster resulting in less resistance and vehicle wear, and improved fuel economy

HORIZONTAL BLADE REINFORCEMENT

provides additional strength across the wider blade

6" DEFLECTOR

keeps snow down on the blade and away from the driver's windshield

DOUBLE LIFT CHAINS

for extra lift strength and safety

4 TENSION SPRINGS

keep the blade upright and offer ample room for addition of a shock absorber kit, if desired

THREE 3/4" OPEN PINS

secure the blade to the quadrant and A-frame assembly, eliminating pin seizure, and easing pin replacement

DISH-SHAPED SKID SHOES

improve surface clearance while plowing forward

1/2" X 6" HARDENED HIGH CARBON STEEL CUTTING EDGE

with top hole bolt pattern

WHY CHOOSE POLY?

Arctic's high density polyethylene moldboards combine the durable, slick characteristics of poly with advanced blade design mechanics to throw more of even the stickiest, wettest snow further and faster. This not only results in more snow being moved more quickly, it also minimizes forward resistance – meaning decreased wear on power trains and increased fuel economy. **Contact your Arctic Dealer to learn more about the high-tech, low-maintenance benefits of poly.**

M3593 SERIES HYDRAULIC POWER UNIT
The M3593 electric hydraulic system, with a 2" x 6" lift cylinder offers proven performance and reliability. Compatible with the Hi Boy mounting kit, this power unit has one of the highest outputs in the industry. Standard operating pressures are 2200 psi and the crossover relief valves are set at 3000 psi. This pump is compatible with all of our control systems.

QUIK*LINK® II AND III MOUNTING SYSTEMS
Featuring an adjustable jack stand, our mounting systems allow you to remove the entire plow assembly as a single unit with the lift frame intact. QUIK*LINK® II uses mounting pins on either side of the system to easily attach and detach the plow from your vehicle. Arctic's QUIK*LINK® III system makes the already-simple mounting system even easier to use by replacing the two mounting pins with a simple single locking bar.

ARCTIC HDXL-P SPECIFICATIONS

Plow Name	HDXL102-P	HDXL108-P
Length	102"	108"
Moldboard Height	29"	29"
Material	3/8" Poly	3/8" Poly
Plowing Width (Full Angle)	88"	94"
Complete Weight	*742 lbs	*769 lbs
Mounting Type	Detachable	Detachable
Removable Lights and Power Unit	Yes	Yes

*Weight does not include undercarriage

STANDARD CONTROLLER

CONTROL BOX
Our standard control box, with two rocker switches – one for up and down, one for left and right – has proven to continue performing reliably over years of use.

OPTIONAL CONTROLLERS

TOUCHPAD
The touchpad responds instantly to the touch of a finger. Used handheld or mounted with a Velcro strip, it allows you to alter the plow's angle in the float position.

JOYSTICK
The joystick is mounted to the window opening in the driver-side door and allows you to alter the plow's angle in the float position.

MINI-JOYSTICK
This smaller version of the joystick is suitable for handheld use or can be mounted with a window bracket. It also allows you to alter the plow's angle in the float position.

HAND HELD
This ergonomic controller has 4 rubber-faced buttons, a float light in the middle and a curly cord. An automatic shut-off eliminates accidental use or drained batteries.

QUIK*LINK® is a registered trade-mark of Arctic Equipment Manufacturing Corporation.

LEGAL DISCLAIMER: Vehicles intended to be equipped with Arctic equipment must comply with the vehicle manufacturers' specifications for equipment application. Please consult your vehicle dealer before purchase and installation. The purchaser assumes all vehicle risk associated with the attachment and operation of Arctic equipment.
