

**OKAY WINTER.
IT'S JUST YOU AND ME.**

Built for medium- to full-size lighter trucks, the **Arctic SD-P** fits on all QUIK*LINK® mounts, and offers all the robust, dependable features Arctic is known for. Whether you are dusting off the street for a game of road hockey or are liberating your neighbors after a storm, the **Arctic SD-P** lets you get down to business. Winter doesn't wait for anyone – why should you?

5 LASER-CUT, STEEL REINFORCING RIBS

back our frictionless poly moldboard with the strength of steel

FULL-SIZE TENSION SPRINGS

support the plow and are attached to a 1/4"-thick boxed quadrant that fixes to a double leg 2" X 2" boxed tubing A-frame with a 1" easy-to-remove greasable and bushed king bolt

1/4" POLYETHYLENE MOLDBOARD

throws snow further and faster resulting in less resistance and vehicle wear, and improved fuel economy

6" DEFLECTOR

keeps snow down on the blade and away from the driver's windshield

HOT-DIPPED GALVANIZED STEEL FRAME

provides added resistance to abrasion, water and rust, making our plows virtually maintenance free

3/8" X 4" NON-REVERSIBLE STEEL CUTTING EDGE

cuts and lifts hard packed snow and ice

DISH-SHAPED SKID SHOES

improve surface clearance while plowing forward

WHY CHOOSE POLY?

Arctic's high density polyethylene moldboards combine the durable, slick characteristics of poly with advanced blade design mechanics to throw more of even the stickiest, wettest snow further and faster. This not only results in more snow being moved more quickly, it also minimizes forward resistance – meaning decreased wear on power trains and increased fuel economy. **Contact your Arctic Dealer to learn more about the high-tech, low-maintenance benefits of poly.**

M673 HYDRAULIC POWER UNIT
Arctic's electric, hydraulic outfront pumps are designed specifically for the quick response required by snowplow applications. The M673 uses a low-amperage draw motor combined with a high-flow pump operating at 2200 psi to give the operator fast plow response with low battery drain.

QUIK*LINK® II AND III MOUNTING SYSTEMS
Featuring an adjustable jack stand, our mounting systems allow you to remove the entire plow assembly as a single unit with the lift frame intact. QUIK*LINK® II uses mounting pins on either side of the system to easily attach and detach the plow from your vehicle. Arctic's QUIK*LINK® III system makes the already-simple mounting system even easier to use by replacing the two mounting pins with a simple single locking bar.

ARCTIC SD-P SPECIFICATIONS

Plow Name	SD84-P	SD90-P
Length	84"	90"
Moldboard Height	22"	22"
Material	1/4" Poly	1/4" Poly
Plowing Width (Full Angle)	75"	80"
Complete Weight	*485 lbs	*498 lbs
Mounting Type	Detachable	Detachable
Removable Lights and Power Unit	Yes	Yes

* Weight does not include undercarriage

STANDARD CONTROLLER

CONTROL BOX
Our standard control box, with two rocker switches – one for up and down, one for left and right – has proven to continue performing reliably over years of use.

OPTIONAL CONTROLLERS

TOUCHPAD
The touchpad responds instantly to the touch of a finger. Used handheld or mounted with a Velcro strip, it allows you to alter the plow's angle in the float position.

JOYSTICK
The joystick is mounted to the window opening in the driver-side door and allows you to alter the plow's angle in the float position.

MINI-JOYSTICK
This smaller version of the joystick is suitable for handheld use or can be mounted with a window bracket. It also allows you to alter the plow's angle in the float position.

HAND HELD
This ergonomic controller has 4 rubber-faced buttons, a float light in the middle and a curly cord. An automatic shut-off eliminates accidental use or drained batteries.

QUIK*LINK® is a registered trade-mark of Arctic Equipment Manufacturing Corporation.

LEGAL DISCLAIMER: Vehicles intended to be equipped with Arctic equipment must comply with the vehicle manufacturers' specifications for equipment application. Please consult your vehicle dealer before purchase and installation. The purchaser assumes all vehicle risk associated with the attachment and operation of Arctic equipment.
